🏏 Cricbuzz LiveStats – Home

Welcome to **Cricbuzz LiveStats** – a cricket analytics dashboard built with:

- 🐍 **Python**
- 🗄️ **MySQL** for structured cricket data
- 🌐 **Cricbuzz API (RapidAPI)** for live and recent match info
- 📊 **Streamlit** for the interactive web UI

What you'll find in this app

- ⚡ **Live Matches** – view current / recent matches from the Cricbuzz API
- 📊 **Top Player Stats** – batting & bowling records using API + SQL
- 🧮 **SQL Analytics** – run pre-built SQL queries on your cricket database
- 🛠️ **CRUD Operations** – practice Create / Read / Update / Delete on players & matches

---

Matches in DB	Series	Teams	Players (profiled)
1	1	2	4

Right now the database is using **sample data** for development and testing. In later steps, we'll add scripts to pull live data from the Cricbuzz API and insert it into MySQL for deeper analytics.
